# Targeted clientele

## Person of any age living with a pervasive developmental disorder.

The persons living with a pervasive developmental disorder present the following characteristics in various proportions:

- > Qualitative impairment in social interaction;
- > Qualitative impairment in communication;
- > Restricted repetitive and stereotyped patterns of behaviour, interests and activities.

Five different diagnoses are found among the pervasive disorders: the autistic disorder, Asperger's syndrome, the Pervasive Development Disorder Not Otherwise Specified, the childhood disintegrative disorder and Rett's syndrome.

## Services
