Hunters, we need your help!

Everyday new cases of COVID emerge in the region. We ask you to follow the health recommandations rigorously.

Here are some tools for a safe hunting season:

At home and at your hunting camp, AVOID and LIMIT SOCIAL CONTACTS. This will help protect your hunting season and keep your family safe when you come back home.

Before Leaving :

If you have symptoms, stay home and complete the autoevaluation tool :

<https://covid19.quebec.ca/surveys/cdd2/introduction>

If recommended by the tool, we ask you to skip the hunting season this year, in order to protect your friends!

At the hunting camp :

- Maintain your physical distance with other people.
- Do not visit other camps.
- Limit your contacts : A maximum of two families (2 addresses) and a maximum of 6 people per camp.
- Bring alcohol-based gel : Wash your hands as often as possible. Bring a tent or hunting trailer, so you have more space and reduce the number of people sleeping in the same space.
- Have one cook per meal, to reduce contacts during cooking.
- Avoid meeting indoors, stay outside when you are together, the virus does not propagate well outside!
- If you can't keep your distance indoors, wear a mask!

Let's care for each other and protect our loved ones!
