

## COVID-19 : THE FIRST ROUND OF VACCINATIONS IN NUMBERS

**Gaspé, January 26th, 2021** – The CISSS de la Gaspésie confirms that the first round of the vaccination campaign to counter the spread of the COVID-19 virus finished at the end of last week.

The continuation of this vaccination campaign, which will begin as soon as the new doses of vaccines are available, will make it possible to reach the clientele prioritized by the Ministry of Health and Social Services (MSSS).

It is important to note that the population of the Gaspésie will be informed, sector by sector, of the vaccinations and will have all the necessary information so that they can easily, and carefully, follow the progress of the campaign. All means of communication will be implemented so that everyone can find answers to their questions and know exactly what the procedure to be vaccinated will be. The information on the first round of vaccinations can be found in the statistical table from regional public health.

"Even if the daily reports that we produce give a positive image of our regional situation in times of pandemic, we must not forget that the health measures that we ask the population to apply must continue to be rigorously followed until a good percentage of the population is vaccinated" specified the regional director of public health, Dr Yv Bonnier Viger.
